My First and Only Gold Coin... Almost! by Ken King

This gold coin came up out of the dirt and put my butt right on the ground. After an awesome morning dirt fishing with Tony Frangella from the club on one of his permissions, I was on my way home when I decided to go by a brand new farm permission I had received recently and go poke around for an hour. As I swung my Teknetics Patriot Metal Detector, in between a couple trees, I got a signal that was strong and repeating, and after digging down about 5 inches, I pulled up this coin. As I brushed some of the dirt off of it, it was gleaming in the sun something fierce. OMG, did I just find my first gold coin? That is all my mind was wondering. Then an image of an eagle became clear my heart raced but I didn't know what I had in my hand. I grabbed my magnifying glass and could just barely make out "matrimon" so I entered into google on my cell phone. "Recuerdo Matrimonial" came up and I quickly learned what I had found was a Mexican Matrimonial Token. Here is what the article says..."

"A Catholic wedding tradition requires that the groom gives the bride a container of 13 coins known as an arras. Wealthy grooms can give gold coins as arras. Next would be silver, then copper coins. Others would use gold-plated or silver-plated tokens (not coins, but they look like coins). Most of these come from Mexico, but there are similar tokens from other countries. These tokens often have the words 'Recuerdo Matrimonial' which translates as 'Wedding Souvenir' or 'Marriage Memory'. Other tokens, specifically 'Maximiliano' gold tokens made to look like old-fashioned coins, could be used as arras..."

Ok, ok, but is this a gold token? I didn't have a test kit with me so I decided to take it home and clean it up a bit more. As I cleaned it, little parts of silver started shining through so I think what I have here is a gold plated one. Gold coin, well yes ... sort of real gold coin? No. Still an exciting find though and very unique.

On a follow up visit a week later, Tony was able to find one out there also not too far from where this one was located. I wonder if there are 11 more over there somewhere? (Actually we went back numerous times but we never found any others.)

Example Coin

The Prez Sez

by Roy Neys

Thanks to all who think I may make a good President. I'll do my best not to disappoint you. I know if I mess up someone will let me know.

Something I need to get out in the open right now is I have been married for 44 years, raised two daughters and a granddaughter; even had a couple of female dogs. I've been pretty successful by calling everyone Sweetheart or Darling. If I should call anyone in the Club Sweetheart or Darling, I'm not being cheeky. I have probably forgotten your name. Just remind me who you are.

Thanks and happy trails!

Some Day Soon!

Goodbye, and Thank You, to an Old Friend

by Bruce Morton

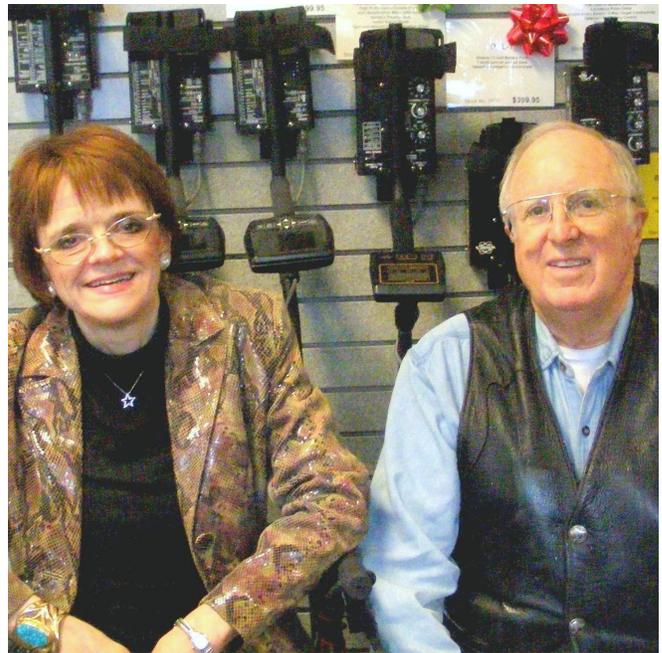

On February 25th, **Gold-N-Detectors** closed its doors for the final time. The business had been under control of the State since the untimely passing of the owner, Louise Smyth, in January 2019. As she had no will, her assets fell to the State to distribute. This past week it was announced that the business had been purchased by the owner of a “prospecting shop” located in Colorado Springs. Follow up on the new owner and plans for the Golden location will be made and information provided in next month’s newsletter.

Gold-N-Detectors was created almost 26 years ago by Bill Chapman. Louise Smyth purchased the business 8 years ago and Bill continued to work with her. They were good friends to our club providing information and training on detectors and prospecting and dis-

counts to members. They also sponsored the very popular monthly “Lulubelle’s Bling” puzzle hunt for a long time.

The author is convinced that he speaks for the club in offering Mr. Chapman a huge Thank You for the long and generous support and a wishing fond Goodbye to Gold-N-Detectors.

TREASURE Mountain Metal Detectors

Jeff Lubbert of Treasure Mountain Metal Detectors, assures us that we still have available a resource for locally purchasing major brand detectors and accessories with the added benefit of special discounts to Eureka! members.

Jeff can be reached at: **303-618-5179**

Joining Eureka! Membership Dues

Yearly dues are \$33 per individual or \$42 for a family membership.

Please go to:

Eurekathc.org

Download and complete the application form under the *About* tab. Membership dues can be paid to the Treasurer at the regular monthly meetings.

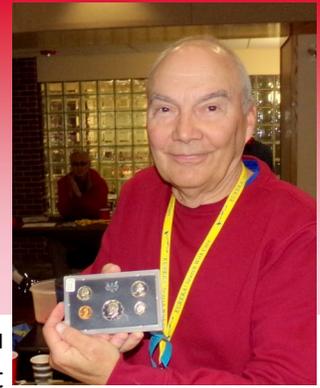

Virtual Meeting

I just want to say thank you to Butch (*American Digger*[®] publisher) for being our speaker at the Eureka Treasure Hunters Club virtual meeting in October 2020. We appreciate his taking the time to join us, and we enjoyed his discussion of metal detecting, personal experiences, and work as a magazine publisher, as well as his great sense of humor. We Coloradans also enjoyed hearing that Georgia accent! My wife (Susan) and I are always delighted when our copy of *American Digger*[®] arrives in the mailbox. Thanks for the outstanding written content and fantastic photographs in each issue. Your magazine is consistently entertaining and inspiring for us as treasure hunters.

Norm Ruggles
Denver, Colorado

Butch was honored to have been a guest speaker in what may become a new norm, at least for a while. This was the first time we were involved in a Zoom format with a detecting club and thanks to your club's preparations, all went smooth. We expect we'll see more of this in the near future. –AD

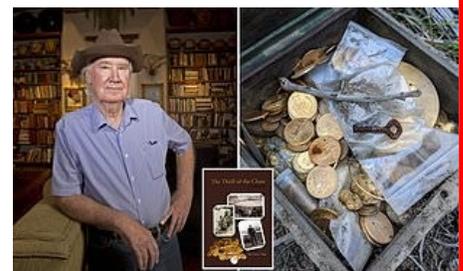

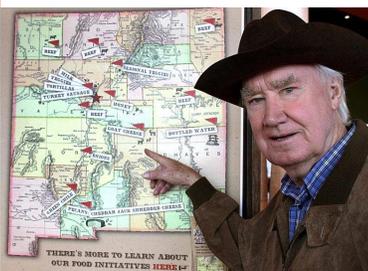

Forest Fenn Treasure Found by Dan Pierson

Since you are reading the newsletter of the Eureka Treasure Hunters Club, you are obviously interested in treasures and surely you have heard of Forrest Fenn. Like a lot of people, I had a passing interest in the treasure but not the fanatical devotion that gripped some. Two of my high school friends spent their vacations each year in pursuit of the treasure with park rangers in pursuit of them. I have always been pretty successful in solving the Tenacious Treasure Tracker clues. Not finding the token, mind you, but I was pretty good with the clues. (This year, Brian, this year I will find the token). I bought Forrest Fenn's other book, *too far to walk*, thinking that it might provide some clues that might link up with the poem clues. Sure enough, there were some anecdotes about his youth and visiting hot springs in Yellowstone. I was convinced that the treasure was in Yellowstone National Park. That put the search area down to a little over 2.2 million acres. Fenn said that the treasure was where an 80-year-old man could carry forty pounds without great difficulty. That eliminated about three quarters of the park and I could take out all 87,000 acres of Yellowstone Lake. That narrowed down my search to a little over 533,000 acres (I'm gonna need a bigger coil) and the poem didn't provide me with any help. I was still fascinated by the hunt, but I didn't

have enough information to pack up my car and head west. As you have heard, the treasure was found in June and, for me, I was most curious about where was it found. I wanted to see how the clues fit into the poem. The actual finder has been pretty quiet and Forrest Fenn passed away in September. I guessed that the finder was putting together a book or film deal and we would have to wait to find out the details. A bad case of Pandemic Boredom led me down a Google rabbit hole recently and I stumbled onto a group of people that claimed to have found the location. The finder had released a photo of the treasure location and this group had used the poem to lead them to a location that matched the photo. Their explanation was not using the words of the poem, but translating the words to a GPS location. In the poem, each time a word that sounds like a number is used it is translated to that number. If multiple numbers are on a single line, they are added together as instructed in the third stanza "add up".

Fenn's Treasure Poem

As I have gone alone in there $1 + 1 = 2$
And with my treasures bold,
I can keep my secret where,
And hint of riches new and old.

Begin it where warm waters halt
And take it in the canyon down,
Not far, but too far to walk. $0 + 2 + 2 = 4$
Put in below the home of Brown.

From there it's no place for the meek, $0 + 4 = 4$
The end is drawing ever nigh;
There'll be no paddle up your creek,
Just heavy loads and water high.

If you've been wise and found the blaze,
Look quickly down, your quest to cease, **2**
But tarry scant with marvel gaze,
Just take the chest and go in peace.

So why is it that I must go
And leave my trove for all to seek? $4 + 2 = 6$
The answer I already know **0**
I've done it tired, and now I'm weak. $1 + 0 = 1$

So hear me all and listen good, **10**
Your effort will be worth the cold. **4**
If you are brave and in the wood
I give you title to the gold. **2**

Starting at the word "Begin" and wrapping back to the top the numbers are: 44260110422

Breaking those into lat. and long. numbers (in North. America) you get: 44° 26' 0" N 110° 42' 2" W

Enter that into Google Maps and it will take you to a nice location in Yellowstone, a mile or two from the DeLacy Creek parking lot.

Now that the location is known will I be going to visit? Should you? ABSOLUTELY NOT! I don't think Fenn or the finder were sloppy enough to leave gold doubloons along the trail. The treasure is gone and there is nothing to see there. Having hundreds of people trampling the area would ruin it.

Forrest Fenn's father was diagnosed with pancreatic cancer and he chose to end his life with an overdose of sleeping pills. When Forrest was diagnosed with kidney cancer he planned on doing the same but with a flourish. He would leave the clues, take the treasure chest with him into the woods to his special spot, end his life and whoever found his remains would keep the treasure. Against the odds, his cancer was cured but he went ahead with the treasure hunt. The location is a very special place for Forrest and the last thing he would want is to have it overrun by curiosity seekers.

Breakfast Club

by Chris Davis

We finally got around to holding a Breakfast Club on the scheduled day. Hunt conditions were far from ideal. High temperatures were in the 40's. It bordered on being nippy, but that was not the main problem. The 20 degree lows we have been having rendering most of the ground frozen, to one degree or another.

Our hardy crew traveled over to Bible Park for our hunt. And, much to our surprise, most of the ground was frozen, to one degree, or another. But, being hardy (and weak minded) we gave it a try anyway. We have done worse on better days. We were able to dig well under the trees. Some of the fields could be dug, with some effort. The problem was, it is

hard to dig in frozen ground without making a mess. As result, I only dug shallow, good targets. I had to skip many of the potential ring targets I would have normally dug.

We did not do overly well in the jewelry category. However, Mike M. did pick up what appeared to be a very nice silver bracelet. Mary S. saved our honor by finding a copper ring. Some of us did fairly well on change, recovered primarily on the soccer fields. Jeff M. did best on change with \$5.70. Bob H. came in second with \$3.95. I ended up with \$3.50.

Hopefully, the hunting conditions will improve by our next scheduled outing on Saturday, Feb. 20.

The “New” Ring by Chris Davis

Some of you may recall, I went off to visit Scotland several years ago. While in Edinburgh, I made the mistake of going into an antique jewelry shop. I chatted with the proprietor about jewelry in the United Kingdom for over an hour and ended up purchasing a gold, man’s wedding band. I had always wanted a 22 karat gold ring, but had to settle for a 22 carat. The English say “carat” instead of “karat” like us ignorant colonials in the United States do.

Jewelry, produced in the United Kingdom in modern times, has a series of hallmarks which tell a great deal about the item. There are often 4 or 5 hallmarks, but sometimes more, sometimes less, and they changed somewhat over the years. One stamp may be the company or individual who made the item. A hallmark on gold jewelry is a Crown, which, of course, indicates the item is gold. By-the-by, to be considered and labeled as “gold jewelry” in the United States, an item must be at least 10K (.417). In England and France, because they are different, an item must only be 9 carat (.375) to be stamped as gold. In Germany, “gold jewelry” need only be 8K (.333). 22K jewelry is composed of .9167 gold. On English jewelry, a stamp documenting

the item is sterling silver (.925) will be a Lion Passant (Lion, facing left). There will likely be Carat mark on the item if it is made of gold. Sometimes the gold content is expressed in parts per thousand, rather than carats. On silver items, the percentage of silver, may be also expressed in parts per thousand. A symbol indicating the Assay Office, or where the item was made, is usually present. For example, items made in London will have a Leopard Head stamp. Edinburgh will have a Castle. Chester will have a

will have an Anchor. A last hallmark unique letter, which tells what year The ring I purchased in Scotland undecipherable maker, Gold mark, assay mark, and was made in 1917. still flying around in 1917. To no

who cannot even figure out how to drive on the right side of the road, uses a completely different ring size scale than the U.S. My Pinky ring size in the U.S. is 8 ½. In England, that would be a Q ½, or Q ¼. My Ring finger is a 9 ½ U.S., or R ½ in Great Britain. My “Scottish” ring was Q ½ and was chosen because of its tight fit on my pinky finger. This suited me fine, on the assumption it would be harder to lose that way, but remember what they say about making assumptions.

I happily wore this ring for 2 years without problem. Then, one day I got in the truck to go detecting and looked down at my hand. The ring was gone. From the time I last knew I had it, until the time I noticed it was missing, I had not left the house, other than to take the dog out to do her business. So, I went over the house with a fine-tooth comb. I metal detected the entire yard, several times. After a year, I have still not found a trace and have no idea what happened to it. I can only conclude it either dissolved when I took my monthly bath, or the Aliens got it on my last space ship

(Continued from page 8)

visit.

Well, as I obviously was not too good at keeping up with a gold ring, I decided to see how long I could keep up with a silver one. I went thru my rather extensive silver ring collection and selected a nice tight one for my pinky finger. The game plan was, if I lost this ring, I would replace it with a copper one, but somehow I managed to wear this ring for over a year, without a losing it. I can only conclude

the Aliens must not have wanted it.

So, I came up with yet another plan, just like I had good sense and lots of money. On my next annual metal detecting trip to England, I would visit an antique jeweler shop I had been monitoring in London. A month or so before going, I would send them a list of items I was looking for in a ring, and see if they could come up with one. I wanted a ring with very specific requirements: a plain man's wedding band, 22 carat, 100 years old, size Q ½ UK (8 ½ U.S.) and

have a Birmingham assay hallmark (according to my genealogy research, I had kinfolk come from Birmingham) (for that matter, I also had kinfolk from Coventry, Shruton and Montecheroux, but they did not have assay offices).

It was a good plan, but the best laid plans of mice and men, sometimes go astray. My annual England metal detecting tour in 2020 was cancelled due to the Covid pandemic. Then, I compounded the problem by continuing to monitor the London antique jewelry shop website. In January, 2021, I learned if they did not come up with just what I was looking for. The ring in question was 22 carat rose gold, had a Birmingham assay mark, was made in 1858 and size Q 1/2. For you younger folks who were not re-

quired to learn history in high school, 1858 was before the American Civil War. I hated to order the ring by mail without trying it on. For some strange reason, 3 rings size Q ½ can all fit differently. But, the ring was too good to pass up, so, I went ahead and ordered it.

It shouldn't have come as any surprise, but when the ring came in, it was too loose on my pinky finger. It would be just a matter of time until it too disappeared. I pondered the ways I could solve the problem. One idea was to wear the tight silver ring behind it, to keep it from falling off. Okay, it wasn't a good idea, but it was an idea. Just for grins and yucks, with some effort, I managed to squeeze the ring over the knuckle of my ring finger. This actually worked out great. It was not too tight, and regardless of what I do, it is not going to come off (without a knife, anyway), so everything worked out hunky dory. I might misplace the hand, but I am not going to lose the ring. Unless I go to visit the Aliens again...

Eureka! Treasure Hunters Club

We will be having our 2021 kickoff hunt at the beautiful Lazy Heart Ranch

The hunt will take place on April 11th at 2:00 PM
Location: Lazy Heart Ranch which is located at
8189 Highway 93 Golden, CO (see map below)
Fee: \$20 per person (Members only)

You will need to send an RSVP by April 1st to coindigr@hotmail.com with the name of each participant that will be attending

The hunt area will be in a working pasture with shallow water ways, rocks, uneven terrain and some cow patties. Please wear appropriate attire (facemask included) and footwear. If you are uncomfortable about being in a group setting please stay home. If you are sick or someone in your house is sick stay home. We will be practicing social distancing at this event.

No food or beverages will be served at the event, please bring your own water and a chair.

A Favorite Old Find - by Alan Bravo

Within a year after Hurricane Katrina hit the Gulf Coast in August, 2005, I found myself in New Orleans on a business trip. Knowing I'd have spare time after my meetings I couldn't resist taking my metal detector along to see what I could find in a city that was founded in 1718. I first went to City Park. Built in 1850 its 1300 acres is nearly twice as large as New York's Central Park. Where they had pulled up several

medium-size trees I located a few Wheat Pennies in the holes left behind. Otherwise, I found lots of change but little else of interest.

While driving around looking for other places to hunt I noted that there were piles of dirt in the median on St. Charles Avenue alongside the tracks where the trolley cars run. Apparently, the tracks had been covered up by water from the hurricane and had to be cleared of mud and debris. Out of curiosity I started detecting the piles and within a short time came across a decent ring. Soon after that came a tone that turned out to be something I had never seen. Later, after cleaning it off I saw that it was a sterling silver birth record rattle made by the Web Silver Company of Philadelphia.

Attached to a white pearlized teething ring was a birth record rattle that features a stylized ribbon and clock face with places for the date of birth and baby's weight. When shaken, it tinkles like a little bell. Due to its unusual nature and beautiful appearance, I consider this to be one my favorite finds.

Secretary's Notes by Nancy Faires

March 2021

Club Meeting, February 12, 2021 (via Zoom)

CALL TO ORDER Chris Davis, President
Time: 7:37 PM

The monthly Eureka! THC Club meeting was held Friday February 12th via Zoom. There were 34 “logged-in” participants including several guests.

Welcome – Chris Davis

Thank you to Alan and Laura for the use of their unlimited ZOOM.

Due to Covid-19 restrictions, we will continue our monthly Club meetings via Zoom (2nd Friday at 7:30 PM), Breakfast Club (1st Friday and the 3rd Saturday) monthly and HART (as scheduled).

REPORTS

Treasurer Report – Linda Kibler

Breakfast Club

The Breakfast Club was cancelled Jan 16th due to frozen ground. An impromptu meeting was held on Jan 22nd at City Park and February 5th was held at Bible Park.

The next scheduled Breakfast Club is Feb 20th, weather permitting.

Speaker – Susie Mireles, Austin, TX Detecting Club

Susie showed photos about obtaining permission and detecting a historical block house in Texas.

New Board Members elected in January
Dan Pierson and Win Faires

Rush to the Rockies 2021 - cancelled

Members are encouraged to continue sending in photos and stories of their finds/hunts for inclusion in *The Soundoff* and *Show-N-Tell* at our Zoom Meetings. Photos for Show-N-Tell should be sent to Chris (with your name noted) and the photos for *The Soundoff* should go to Marty.

Send any photos/stories for the *Corner Booth* to Bruce. There will be one, final issue soon.

Attendance Drawing (you must be a paid member, logged in with your name and be present to win)

Walking liberty half – Chris Davis

Standing liberty quarter – Roy Neys

Washington quarter – Mike Magee

Prizes will be available at the Breakfast Club for pick-up or Roy will hold until our next face-to-face meeting.

INSTALLATION OF NEW OFFICERS

President – Roy Neys 2021 – 2023

VP – Kevyn Llewellyn 2021 – 2023

Treasurer – Linda Kibler 2021 – 2023

Secretary – Nancy Faires 2021 – 2023

Board: Jeff Lubbert, Brian Henry, Linda Erickson, Win Faires – 2021 – 2022

Alan Bravo, Ken King, Dan Pierson – 2021 – 2023

Newsletter Editor – Marty Stone 2021 - 2023

Thank you to all the retiring officers and Board members: Tom Peoples, Boots Lewis, Bruce Morton, Chris Davis.

Next meeting: March 12th, 2021 at 7:30 PM via Zoom. A ZOOM email invite will be sent.

ADJOURN Roy Neys, President
Time 8:49 PM

Respectfully submitted,
Nancy Faires
Secretary, Eureka THC

Garth Ring Recovery

by Jeff Lubbert

The summer of 2019 Garth was at the private reservoir for the development that he lives in with his family. Out in deeper water the reservoir has floating docks for sunning and also a diving board on each of the docks. As his family made their way onto the dock for a bit of sunning Garth swam over to a log that was nearby and gave the log a spin. When he spun the log a piece of bark somehow caught his platinum wedding band and pulled it off his hand. He attempted to dive down to recover the ring, but the depth made free diving difficult and the weeds that lined the bottom of the reservoir made such an attempt very dangerous. Garth never gave up on the idea of someday, somehow, he would be able to get his ring back even

though his family was urging him to get another ring. This winter, those in control of the reservoir lowered the water level well beyond normal. Garth saw this lower water level and started researching for a way to recover his ring, that is when he found me and we set up a date to search for his ring.

When Garth and I talked he mentioned that the ring was in what he thought would be chest deep water. The calendar was only in January, there was a sheet of ice on the reservoir and the water temperature was not above 35 de-

grees. I knew that this search was not going to be comfortable for me physically. I needed my neoprene chest waders, my water scoop and a good bit of luck. We set a date for me to come and conduct a search on a day that the forecast was looking good for Colorado in January; highs were expected to be in the mid 40's. I arrived at Garth's residence and we set out for the reservoir which was within their private community. That day, a Thursday, I searched for a little over an hour but I had to give up due to my arm being numb (a bare arm in 35-degree water isn't recommended) and the sun had set. So, we left an open search agreement for me to come back and search again when the weather cooperated, and it would also have to be a weekend as well.

A week passed by and weather looked good enough to conduct another search on the weekend which would give me more time to search. I met Garth at the reservoir and this time I had added a pair of neoprene gloves and a 5.3 mil wetsuit to protect my arms from the cold water. After a couple of hours of searching I received a good signal on my CTX, it took me several scoops to get the target into my

scoop, and as it turned it was Garth's wedding band! When I shouted out to him (he was on the shore) that I had a ring in my scoop he sank to a crouching position placing his face in his hands. He was a bit taken over with emotion that we had finally found his ring.

We made our way back to his house to have a celebratory beverage and I got a chance to meet the rest of his family. Garth's wife made a comment that will stick with me for a while, she said that by finding that one ring I had realistically saved two rings. She was planning on melting her ring down to make Garth a new ring. I was a bit shocked by such a sentiment and also it made me feel even more proud that I had recovered Garth's ring.

About Soundoff

Soundoff is the official newsletter of the Eureka! Treasure Hunters Club, Inc. (Eureka!). Mailing Address: PO Box 101385, Denver, CO 80250-1385.

Opinions expressed in **Soundoff** are those of the authors and do not necessarily reflect those of the club or its members. Publication of information in **Soundoff** constitutes no guarantee of accuracy. Use of any information found in this publication is at the sole risk of the user. Neither Eureka!, nor its officers, nor **Soundoff**, nor its editors or contributors assume any liability for damages resulting from use of information in this publication. **Soundoff** is typically placed on the club's website the evening of the first Friday of the month.

Submissions

Articles, letters and short items of interest on prospecting, detecting and treasure hunting topics are welcomed and encouraged. All items submitted for publication are subject to editing. Submittals for publication or correction of errors may be made by e-mail in ASCII text format or MS Word. All article submissions must be received by the editor no later than the deadline of the month (see calendar) for inclusion in the next month's issue. Include publication information on articles clipped from other publications. **Let's hear your story, ideas or tips - contact your **Soundoff** editor.**

Copyright

Unless otherwise noted, other nonprofit groups may reprint or quote from any articles appearing in **Soundoff** without prior permission, provided that proper author and publication credits are given and that a copy of the publication in which the article appears is sent at no cost to Eureka! at the above mailing address.

Advertising

Classified business-card-sized text advertising is free to members for non-business ads. Commercial display ads are available to anyone at the following charges: business card size, \$6.00 per month; 1/4 page, \$12.00 per month; 1/2 page, \$24.00 per month; full page, \$48.00 per month. Advertisers are encouraged to take out ads for 12 months and receive a 3-month discount. No other discounts apply. The treasurer must receive any required payments for commercial ads prior to their inclusion.

About Eureka!

Eureka! is a Denver-based, Colorado nonprofit organization established in 1973 for the enjoyment of metal detecting, electronic prospecting and treasure hunting. Its purpose is to provide an educational and social forum of mutual benefit for members. Eureka! holds a monthly meeting and conducts various special presentations, hunts and seminars. Members have voting privileges. Membership includes access to all general meetings, selected seminars and outings. Annual dues run April to March and are \$33 for single adult membership, \$42 for a family membership and \$15 for Junior membership. Pro-rating of dues are done for new members joining the club after the April 1 dues date. Club meetings are held on the second Friday of each month, 7:30 p.m., at the Clement Community Center, 1580 Yarrow St., Lakewood, Colorado. Come early to socialize.

Next Club Meeting
The March 12th meeting will
be held remotely, via Zoom,
at 7:30 p.m.

The emailed invitation to join the session should reach you by 7:15 p.m.
